DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Gianchandani et al.

Regarding claim 1, Gianchandani et al., discloses a micromachined scanning thermal probe method and apparatus with features of the claimed invention including a substrate, a cantilever beam fabricated upon the substrate, the beam having a fixed end attached to the substrate and a free end, and the beam being made from any material of interest; and at least one electrical connection to the beam (see figures 1 and 2).

Regarding claim 2, there are various fabrications on the substrate that can be called actuators (see, for example figure 12).

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
